

**SPRING 2024**  
INLINE FOOTWEAR

**HOKA**  
FLY HUMAN FLY

## INNOVATION IS THE HEART OF HOKA.

Every HOKA shoe combines three technologies precisely tuned to give each athlete a specific experience. Racers get more speed. Hikers more comfort. Trail runners more confidence. All in a shoe geometrically designed for unmistakable comfort

## THE HEART OF HOKA

### METAROCKER™

**The Wheels to Move You Forward**

Designed to drive runners forward, MetaRocker™ geometry complements the natural gait cycle and reduces the height differential between heel and toe.

### CUSHIONED MIDSOLE

**Marshmallow Softness**

Ultralight and endlessly cushioned, HOKA midsoles offer shock absorption, comfort and support in varying degrees of thickness.

### ACTIVE FOOT FRAME™

**The Bucket Seat**

The Active Foot Frame™ functions like the bucket seat in a racecar, cradling the heel and embedding the foot securely into the midsole.

## HOKA TECHNOLOGIES

### J-FRAME™

**Stability with Freedom**

Designed to combat overpronation, J-Frame™ innovation delivers extended support with a firmer foam on the medial side where the foot typically rolls inward.

### SWALLOWTAIL™

**Independent Suspension**

Our forked heel allows for adjustment on uneven terrain and ensures smoother heel-to-toe transitions.

### H-FRAME™

**Secure Every Step**

Engineered for enhanced stability, our intuitive H-Frame interlocks with the midsole to create a secure base.

### HUBBLE® HEEL

**Effortlessly Smooth Transitions**

Building on HOKA heritage, the extended Hubble® heel is designed to limit impact on the body and create smoother heel-to-toe transitions.

### PROFLY™

**Intelligent Cushioning**

A two-part midsole that pairs a soft top layer of foam with a responsive bottom layer of foam to deliver an energetic ride.

# MATERIALS + CREATION PROCESSES

We recognize that producing footwear and apparel has a global impact, and it carries an obligation to advance sustainable business practices and **good business ethics**. For more information on our efforts toward more **sustainable manufacturing** and information on corporate, human, and environmental responsibility measures taken by HOKA and Deckers Brands, visit [hoka.com/corporate-responsibility](https://hoka.com/corporate-responsibility).

## GORE-TEX

### Footwear Fabric with Recycled Textile

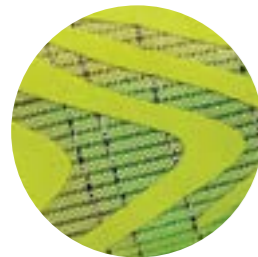

An environmentally conscious approach to waterproofing, GORE-TEX footwear fabric with recycled textile utilizes an ePTFE (expanded polytetrafluoroethylene) film or membrane, post-consumer recycled fibers in its backer, and PFC-free chemicals.

## GORE-TEX INVISIBLE FIT

### With Recycled Content

Designed to virtually disappear, the GORE-TEX Invisible Fit membrane is bonded directly into the upper for lightweight, flexible protection from the elements.

## MATRYX®

A ridiculously light, extra-durable woven material with hydrophobic properties, MATRYX® is abrasion resistant to help you get the most out of your runs.

## VIBRAM® MEGAGRIP

An industry leader in durable rubber for outdoor products, Vibram® Megagrip is a high-performance, extra-sticky rubber that provides enhanced grip on wet and dry surfaces.

## VIBRAM® MEGAGRIP

### With Litebase Construction

A high-performance rubber that reduces outsole weight while maintaining performance, Vibram® Megagrip with Litebase construction reduces outsole thickness about 40-50% and reduces the tread weight about 25-30%.

## VIBRAM® WITH TRACTION LUG

Vibram® with Traction Lug technology increases the surface area of outsole rubber, allowing for more rubber contact with terrain.

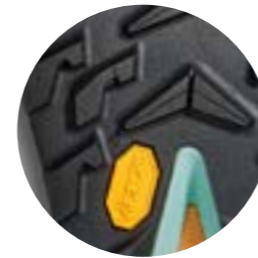

## VIBRAM® ECOSTEP RECYCLE

Delivering the same grip, performance, and durability that Vibram® is known for, Vibram® EcoStep Recycle is a pioneering eco-compound derived from up to 30% recycled materials.

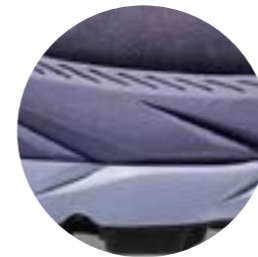

## VIBRAM® ECOSTEP RECYCLE EVO

The next evolution of Vibram® EcoStep Recycle, EVO is a high-quality outsole compound that employs 30% recycled XS Trek for enhanced performance.

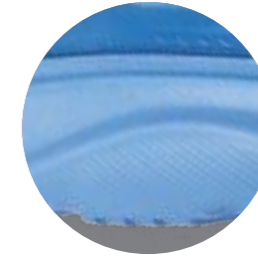

## VIBRAM® XS TREK

Delivering an optimal balance of traction and durability, Vibram® XS Trek is a versatile, non-marking outsole compound that allows for adaptable, wet-to-dry traction.

## RUBBERIZED FOAM

Lighter than traditional rubber and more resilient than EVA, rubberized foam delivers an energized ride with a proprietary blend of rubber and EVA.

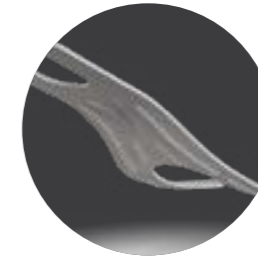

## SUGARCANE EVA FOAM

Designed to reduce our reliance on petrochemicals, our sugarcane and EVA blend delivers the same durability without impacting performance.

## PEBA FOAM

An ultralight foam created using the supercritical foaming process, PEBA is used in our energetic models for enhanced rebound and resilience compared to traditional EVA.

## PLATED TECHNOLOGIES

Providing a propulsive ride, our Pebax® and carbon fiber plates deliver a durable, lightweight solution for dynamic energy return.

## SUPER CRITICAL FOAMING PROCESS

By using high pressure and temperature, we're able to boost foam expansion and create foam with a soft, unique feel.

A photograph of two female runners in HOKA athletic wear running on a paved path in a park. The runner on the left is wearing a bright blue short-sleeved shirt and black leggings with the HOKA logo on the lower leg. She is wearing blue and orange HOKA running shoes. The runner on the right is wearing a teal long-sleeved shirt and black shorts with the HOKA logo on the lower leg. She is wearing white and grey HOKA running shoes. The background features lush green trees and a street lamp, suggesting a park or urban setting. The word "ROAD" is overlaid in large white letters on the left side of the image.

**ROAD**

# SKYWARD X

The Plushest Ride on the Road

We threw out the rulebook when creating the **SKYWARD X**. Pushing soft and smooth to the extreme, this cushy new trainer features a revolutionary suspension system with a convex carbon fiber plate that allows the suspension system to compress and spring back with each step. A soft, highly resilient PEBA foam sits closest to the foot for a lively, cushioned ride, while a super critical EVA frame provides a stable base for your easiest miles yet.

# CLIFTON 9

Light and Plush for Everyday Miles

The ninth iteration of our award-winning franchise, the **Clifton 9** is lighter and more cushioned than ever before. Eliminating weight while adding 3mm in stack height, this daily runner delivers a revitalized underfoot experience with a **responsive new foam** and improved outsole design. Removing overlays and hotmelts, the stripped back upper has been consciously crafted with a **plusher heel**, **reflective heel panel**, and **streamlined tongue** with single-side medial gusset.

# ARAHI 7

A Surprisingly Sleek Stability Shoe

Not your average stability shoe, the new **Arahi 7** delivers the same streamlined support as its predecessor with our patented **J-Frame™** technology. Updated with a zonally engineered, **flat knit upper** for improved midfoot lockdown, we've fine-tuned the fit with a **plusher tongue**, **mid-foot ghillies**, and a stretchy **dual gusset** beneath the lace line to help mitigate tongue migration.

**What's new:** Grounded in the same supportive J-Frame™ as the last iteration, we've added a breathable, flat-knit upper, plush tongue, mid-foot ghillies, and dual gusset.

# MACH 6

Your Gateway to Everyday Speed

Behold our lightest, most responsive **Mach** to date. This lively trainer has been fine-tuned for extra energy return with a **super critical foam** midsole and updated for enhanced durability with strategic rubber coverage in the outsole. Implementing speed focused design details throughout, we've enlisted a new **creel jacquard upper** with **zonal breathability** and an **internal gusset** to deliver the foot-hugging comfort required to set your next PR.

**What's new:** You'll find a super critical foam midsole, along with a creel jacquard upper and refinements to the collar and tongue.

# MACH X

Tuned for Training. Ready for Race Day.

What do you get when you cross the comfort and support of the Mach with a propulsive **Pebax® plate**? You're looking at it. A pace-pushing trainer built with high-rebound cushioning; the **Mach X** is supercharged with a layer of **PEBA foam** that's 34% more resilient than the Carbon X3 foam. Softer and snappier than ever before, this adaptable trainer is comfortable enough for endurance efforts and responds equally well to pace increases.

# CIELO X1

A Propulsive Ride for Pure Speed

When it came to creating the new **Cielo X1**, we kept our foot on the gas pedal and eliminated anything that didn't enhance the ride. Designed with dynamic cutouts for weight savings, this ultra-fast road racer features a winged **carbon fiber plate** sandwiched between two layers of resilient **PEBA foam**. Sporting a speed-centric **rocker** shape, breathable knit upper, and **gusseted knit tongue**, you'll be locked and loaded for racing.

# ROCKET X2

The Road, Remastered.

A tip-of-the-spear product geared for elite runners, the **Rocket X 2** has been amplified with a hyper-focus on construction. We've remastered the geometry of our propulsive **carbon fiber plate**, sandwiching it between two layers of ultra-responsive, **high-performance foam**. Employing a **technical synthetic mesh upper** for a foot-hugging fit, this front-of-the-pack shoe enlists a sleek gusset and internal midfoot cage for race-ready lockdown.

# CIELO ROAD

An Ultra-Light, Feel-Fast Flat.

Calling all front-of-pack racers, PR-setters, and podium finishers. This one's for you. Engineered for runners who train hard and race harder, the **Cielo Road** was designed to deliver quintessential HOKA performance that virtually disappears underfoot. A road racing flat tuned for higher tempo pickups, this ultra-light speedster features a **breathable mesh upper**, highly-responsive **PEBA foam**, and **built-in "chassis system"** for ultimate foot lockdown.

# CIELO FLYX

The Most Energetic Spike on the Track

When it comes to cushioning, we prescribe to a very strict, "more is more" policy. Built to the maximum World Athletics' standards, the new **Cielo FLYX** breaks the mold with 25mm of bouncy, high resiliency **PEBA foam**. We've employed a composite plate that doubles as both a midsole propulsion plate and outsole spike plate, along with an ultra-breathable, **engineered mesh upper**, to deliver an elite race spike that will tackle anything from 1500 meters to 10K and every Steeplechase in between.

# CIELO X 2 MD

A Carbon-Plated Middle-Distance Spike

A tip-of-the-spear product geared for elite athletes, the **Cielo X 2 MD** has been overhauled with refinements underfoot and a newly designed upper. Utilizing a new, **super critical foaming process** combined with a slightly stiffer **Pebax® spike plate**, this lightweight racer delivers a **snappier, faster ride**. Engineered specifically for middle distance racing (800m-3K), we've employed an ultra-light, lace-knit upper for a breathable, race-ready fit.

# CHALLENGER 7

Street-Approved. Trail-Tested.

Built at the intersection of road and trail, the **Challenger 7** has been completely reimagined from the ground up. Combining a simplified **mesh upper** with a **soft new foam**, we've increased the stack height for a plusher feel and added **proprietary rubber** to the bottom unit, along with a reimagined outsole design for the best all-terrain ride yet. Inspired by gravel tires, we've cued up smaller, tightly spaced lugs in center and larger, more aggressive lugs at the perimeter designed for improved traction on uneven terrain.

# TECTON X 2

Carbon-Plated Propulsion for the Trail

Engineered to maximize weight savings, the **Tecton X 2** has been refined with a **Matryx® upper**. Light, breathable, and inherently hydrophobic, our high-contrast Matryx® upper enlists a lay-flat **gusseted tongue** to help mitigate trail debris. A propulsive trail runner designed to inspire confidence on varied terrain, the Tecton X 2 is propelled by the same **parallel carbon fiber plates** that made its predecessor a fast favorite among trail running enthusiasts.

# ZINAL 2

Fly on the Trails

The **Zinal 2** was designed to deliver the same light, responsive precision as its predecessor with a touch more energy return. We've removed 2mm of stack height and added **taller lugs** for an aggressive, toothy grip underfoot. Updated with a **stretch-knit collar** to keep trail debris at bay, this ultralight silhouette employs the same **Vibram® Megagrip with Lightbase construction** as the original icon.

# HOPARA 2

Feels Like a Sandal, Functions Like a Hiker.

Equally at home by land or water, the **Hopara 2** tackles mud, dirt, and rocks with the same amphibian-like ease. Reconceived with earth-conscious materials, we've implemented a 30% sugarcane topsole, **100% rPET knit upper**, and 100% recycled Cordura mesh overlays to allow for water drainage while keeping trail debris at bay. Engineered with a **toggle lace**, **adjustable heel strap**, and **quick-dry** water repellency, there's no need to take your shoes off at the next creek crossing.

**What's new:** Comfort upgrades abound across the upper and topsole (think new sugarcane topsole, knit upper, and open mesh, along with an adjustable heel strap).

Abrasion resistant synthetic / Engineered jacquard mesh with 60% recycled yarn / Metal lacing hardware / Recycled content lining mesh and laces / Molded PU sockliner derived from 50% soybean oil

Pebax® plate derived from 90% castor-oil / Dual-density midsole with 30% sugarcane EVA / Hubble® heel with SwallowTail™ geometry

Vibram® XS Trek / 5mm lugs

# TRAIL CODE GTX

Light, Cushioned and Ready for Everyday Adventures.

Honoring the unspoken code of the trail, this day hiker treads lighter with responsible manufacturing practices. Grounded in a **Hubble® heel** with **SwallowTail™ geometry**, the **Trail Code GTX** uses a **responsive new foam** for **exceptional cushioning**. Finished with dimensional screen printing to decrease waste and increase durability, this trail contender was made for exploring.

# RESTORE TC

Maximal Comfort. Minimal Materials.

A progressive slip-on designed with the circular economy in mind, **Restore TC** is engineered from minimal materials and employs a simple, three-part construction. Pairing a **stretchy, sock-like upper** with a **30% sugarcane-based EVA insole** and **20% sugarcane-based EVA outsole**, we've enlisted a protective EVA toe cap and targeted stretch zones for the ultimate in all-day comfort.

**YOUTH**

# MACH 6 Y

Everyday speed for future flyers.

What kid doesn't want to go Mach speed? Our thoughts, exactly. Delivering the same snappy ride as our adults' style, the kids' **Mach 6** is light, fast, and undeniably comfy. A lively pavement pounder geared to go the distance, we've cued up a **44% recycled woven upper**, cushy **50% sugarcane EVA midsole**, **protective toe cap**, and **Durabrasion rubber outsole** that's thicker than our adults' version for the extra durability your kiddos need.

Durabrasion rubber

# CLIFTON 9 YOUTH

Big performance. Small size.

Designed for future milers and marathoners alike, our brand-new **Clifton 9** Youth delivers the same disruptive performance features in a slightly smaller package. Approached through the lens of sustainability, we've cued up an ultralight **50% sugarcane midsole**, **31% rPET yarns** derived with reduced water for less emissions, and **high-abrasion rubber** in targeted wear zones for enhanced durability. The result? A future-friendly design built with the next generation in mind.

Molded, removable EVA sockliner / CMEVA with Sugarcane EVA / Early stage MetaRocker / Inherently stable geometry

Extended durabrasion rubber coverage

# ORA RECOVERY SLIDE 3

Big recovery. Small size.

Breaking the mold in its inaugural season, the **Ora Slide 3 Kids** makes its debut, sporting airflow vents so groundbreaking we modeled an adult style off the kid's version. Loved for its cushy, post-run relief, this slip-on silhouette enlists earth-friendly materials, including **35% sugarcane across the midsole and topsole**. Engineered with dual-density EVA construction, this next-generation slide employs softer foam directly underfoot and rubberized EVA beneath to supply the durable traction active kids require.

# ANACAPA 2 LOW GTX

A Versatile Hiker Designed to Tread Lighter.

Live that trail life in shoe-like comfort that offers the extra protection needed to handle nature's challenges. Made with a **50% sugarcane EVA midsole**, grippy rubber outsole, and just-enough support, our **Anacapa** for kids is made to let the curious follow their hearts off road and into the wild.

# SPEEDGOAT 5 YOUTH

A trailblazer for the next generation.

Built off the blueprints of HOKA's original trail icon, our brand-new **Speedgoat 5 Youth** has been unleashed, engineered with the same rugged performance features as its predecessor. Thoughtfully designed with an eye towards sustainability, this next generation trailblazer enlists a woven mesh upper with **21% rPET yarns**, **ultralight 50% sugarcane midsole**, durable lugs, and quick toggle lace for adjustments on the fly. Disclaimer: you may not be able to keep up with your little one.
