Any time,
any pace.

Whether you run, walk, or anything in between – we’re committed to embracing the way you move. So, we make sure our gear gives runners and walkers all the things they need to hit their stride. Whether it’s performance apparel or shoes engineered with cutting-edge technology, we have gear to help anyone forge their own path.

This season, new footwear options help runners elevate their run in more ways than one. On the road, the updated Glycerin 21 and Glycerin StealthFit 21 offer runners plush, soft cushioning and smooth transitions with the option to customize the support and fit with the Glycerin GTS 21 and Glycerin StealthFit GTS 21, to fit seamlessly into runners’ lifestyles. The Hyperion Elite Collection grows with the introduction of our fastest racing shoes yet: the Hyperion Elite 4, Hyperion Elite LD spike, and Hyperion Elite MD spike. Designed with the help of our sponsored athletes, these shoes boast responsive technology, like nitrogen-infused DNA FLASH v2 and reengineered propulsion plates, to help runners hit high speeds on race day.

We’ve also updated our trail line to offer performance and protection for trail runners and hikers alike – whether you’re barreling down single track or traversing dynamic terrain. The Caldera 7 gets an update this season – now with even more nitrogen-infused DNA LOFT v3 technology, the shoe provides soft, adaptable cushioning for long-haul efforts on the trails. The all-new Catamount Agil is our lightest and fastest trail shoe ever with a streamlined silhouette and second-skin feel for designed to confidently propel you to top speeds with our new SpeedVault Propulsion Plate while providing the engagement needed to navigate technical terrain on race day. The updated Catamount 3 is lightweight and responsive thanks to our nitrogen-infused DNA FLASH midsole cushioning with an updated upper for a more protective, distraction-free feel so runners can take on ultra-distances in comfort.

The innovation continues in our apparel technology as we introduce GO₂TM. Inspired by runner feedback, GO₂TM fabric delivers lightweight breathability to every run and pairs with our powerful weather-focused technology to remain breathable while offering everything from water-resistance to insulation. In addition to GO₂TM, we also launch our all-new Luxe collection this season. Whether you wear it on the run or out and about, the Luxe tops offers a silky smooth feel and lightweight, airy comfort all day long. Updates to the High Point apparel collection give committed trail runners versatile styles featuring the storage, mobility, and protection from the elements they need to enjoy miles in nature with distraction-free comfort. Our run apparel pairs perfectly with thoughtfully designed accessories that effortlessly add to your run.

No matter where you go, or how far you’re going, we’re dedicated to shining the spotlight on all runners and walkers by creating gear as diverse as they are.

No two runners alike

Run Signature helps you pick the right shoes. We start by determining the deviation between the way your body moves while on the run versus off - this result determines your need for support.

Then you choose your preferred experience: cushioning to keep things soft, spring-like energy to propel you forward, or featherlight speed so you can push your pace. We use what we learn to match you with your perfect running shoes.

A SHOE FOR EVERY RUN. A SHOE FOR ALL WHO RUN.

ROAD SHOES DEFINED BY **BROOKS** RUN SIGNATURE

Miles of options.
Maximum softness.

This season we're offering more – more cushion, more options, more comfort. Our super-soft Glycerin 21 and Glycerin StealthFit 21 have a boost of responsive, nitrogen-infused DNA LOFT v3 cushioning for supreme softness underfoot. Designers packed in even more DNA LOFT v3 cushioning while keeping the shoe lightweight, so runners and walkers can get even more of the plushness they love. Wearers can get the fit they want by choosing between the performance fit runners and walkers know and love – which offers a classic blend of cushion and breathability – or StealthFit, which provides stretch and compression for an adaptable fit and sleek look. Plus, Glycerin GTS 21 and Glycerin StealthFit GTS 21 combine cushion and support thanks to GuideRails® technology, which helps align the body in its natural motion path for distraction-free comfort on the run.

Our Cushion lineup also features the Ghost 16, updated with our super-soft, nitrogen-infused DNA LOFT v3 midsole technology to deliver reliable cushioning and comfort with every stride. The new Ghost 16 is joined by the all-new Ghost Max, which provides a protective, comfortable feel to runners and walkers alike thanks to our unique midsole rocker geometry – GlideRoll Rocker – that actively assists in rolling your foot forward for an effortless feeling underfoot. A tall stack of DNA LOFT v2 foam to cushion every landing and reduce pressure underfoot for a protected feeling on the go.

NEW GHOST MAX

Soft, smooth, and protective for maximum comfort.

Protective Cushioning

A high stack of DNA LOFT v2 cushioning and unique GlideRoll Rocker work together to decrease pressure underfoot for protective comfort.

Assisted Transitions

GlideRoll Rocker actively promotes smooth heel-toe transitions for an effortless feeling as you move.

Stable Ride

A broad base offers inherent stability for a secure feel that doesn't interfere with a neutral stride.

Additional Benefits

- Helps keep some people moving in their habitual motion path.
- Soft cushioning, GlideRoll Rocker, and lower (6mm) offset can benefit plantar fasciitis, metatarsalgia, and Morton's neuroma.
- GlideRoll Rocker can help reduce muscle strain at ankle joint.
- Unique Linear Last construction makes fit inclusive of foot shapes and orthotics.
- Rubber outsole.
- Made with recycled materials equivalent to 10 plastic water bottles.

MAX SUPPORT

BEAST GTS '23

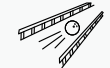

ARIEL GTS '23

Maximum support gets even more comfortable.

Resilient cushioning

Soft, nitrogen-infused DNA LOFT v3 cushioning is long-lasting and adaptable, helping to protect the body from impact.

GuideRails® holistic support system

Our innovative technology supports your body in its natural motion path while keeping excess movement in check.

Secure fit

3D Fit Print technology on the upper provides a strategic balance of stretch and structure for a secure fit without feeling stiff.

What's New

- A full-length Segmented Crash Pad delivers smooth heel-to-toe transitions.
- HPR in heel provides durability against wear and tear while a blown rubber outsole is responsive and durable.
- Linear last construction of the midsole and outsole offers support and stability.

Additional Benefit

- Made with recycled materials equivalent to 5 plastic water bottles.

Unlock your potential

Hyperion Elite 4

Whether you're chasing down PRs or a spot on the podium, we have the shoes you need to get there. This season, we've updated the Hyperion Elite to help runners stay on their game. Developed and tested with our professional athletes, the new Hyperion Elite 4 road-racing shoe features our speedy, ultra-lightweight, nitrogen-infused DNA FLASH v2 midsole technology and our SpeedVault Race+ Plate, with just-right bending stiffness and no added weight. It's one of our fastest-performing shoes yet, joining the Hyperion, Hyperion GTS, and Hyperion Max in offering runners a responsive boost to help take them to their fastest speeds — and beyond.

DNA
FLASH v2

SpeedVault
Race+ Plate

SPEED
NEUTRAL

NEW HYPERION ELITE 4

Designed by the pros for next-level speed for road races.

Unisex

Built to win

New, nitrogen-infused DNA FLASH v2 cushioning is lighter and more responsive, delivering powerful energy return to propel you toward the finish line.

Fine-tuned propulsion

SpeedVault Race+ Plate is lightweight and customized to each shoe size to provide optimized stiffness for every runner.

Race-ready fit

Updated upper locks down your foot for a secure feel while streamlined design allows for distraction-free comfort and barely-there feel.

Additional Benefits

- DNA FLASH v2 delivers nearly 10% more energy return and is lighter than the previous version.
- DNA FLASH v2 cushioning helps to absorb impact and keep your legs feeling fresh from start to finish.
- SpeedVault Race+ Plate is made using Additive Molding, a new technology that uses bio-based materials for near-zero waste.*
- RapidRoll Rocker – the curved sculpting of the midsole – works with the carbon fiber plate to propel you forward.
- Developed and tested by Brooks sponsored athletes.

NEW HYPERION ELITE LD

Shatter PRs in long-distance events on the track.

Unisex

Lighter, springier cushioning

New, nitrogen-infused DNA FLASH v2 cushioning is lighter and more responsive, optimized for long-distance track events to keep you light on your feet for the length of your race.

Fast & propulsive

New, SpeedVault Race+ Plate provides greater bending stiffness while remaining lightweight and flexible to deliver propulsive push-offs for mid-race surges and finishing kicks.

Aggressive traction

Six-pin spike configuration delivers traction for powerful toe-offs while making tactical moves for your final kick.

Additional Benefits

- DNA FLASH v2 delivers nearly 10% more energy return and is lighter than the previous version.
- Removable spikes are made of a new, strong and lightweight material for high-speed races.
- Developed and tested by Brooks sponsored athletes.

HYPERION

A punchy ride for speedy strides.

Updated fast ride

Re-engineered to promote faster transitions. The midsole – featuring lightweight, nitrogen-infused DNA FLASH foam – and outsole work together to deliver a powerful toe-off and more speed.

Ultralight design

The shoe is the lightest training shoe in our line, allowing for quick transitions on the run.

Breathable upper

Updated with a new warp knit and mesh, the upper is now lighter-weight with better breathability.

What's New

- Updated midsole and outsole accelerate heel-toe transition for a faster ride.
- Enhanced upper is lighter and more breathable than before.
- Redesigned tongue with a partial gusset provides better lockdown and secure fit.

Additional Benefit

- Rubber technology in forefoot and heel are strategically placed to conserve weight and promote fast transitions.

Whether you're barreling down smooth single-track or navigating technical terrain, we have the adaptable, protective footwear you need to connect with the trails.

Catamount 3

The updated Catamount 3 helps trail runners reach new heights on the trails, featuring a more streamlined construction than before that moves with your foot as you ascend vertical and jump over streams. The Catamount 3 features a SkyVault Trail Plate to help you drive uphill with powerful energy return, and it works with nitrogen-infused DNA FLASH midsole technology to create a responsive, fast ride.

Catamount Agil

The all-new Catamount Agil is our fastest and lightest trail shoe ever. Featuring lightweight, nitrogen-infused DNA FLASH v2 midsole technology, the Catamount Agil provides featherlight cushioning and responsiveness while keeping you close to the trail for an engaged ride on race day. The new SpeedVault Trail Plate works to drive you forward with powerful energy return so you can reach top speeds on the trails — plus, it uses an articulated construction to help you maintain agility while offering protection over dynamic terrain.

Your top trail companion

Caldera 7

The Caldera continues to be a workhorse shoe for trail runners and hikers who love logging long miles. The updated Caldera 7 features nitrogen-infused DNA LOFT v3 cushioning and a new upper made with durable, abrasion-resistant and breathable mesh that offers a dynamic, yet secure, fit. A new TrailTack Green outsole is constructed with 25% recycled material, making the Caldera 7 not only good for the trails, but also for the planet. All these updates come together so the Caldera 7 can deliver long-lasting comfort, no matter how far you go.

SPEED TRAIL 

NEW CATAMOUNT AGIL

Race technical trails at top speeds

All-out speed for racing technical terrain

The new SpeedVault Trail Plate is designed to propel you to top speeds on race day and works with nitrogen-infused DNA FLASH v2 midsole technology to create a lightweight, responsive ride.

Agile & responsive design

Midsole and outsole are precision engineered for speed – lower stack height and responsive underfoot feel allow you to remain agile at top speeds and tackle dynamic terrain while the articulated SpeedVault Trail Plate helps you maintain footing.

Locked-in fit

Lightweight mesh upper contours to foot for second-skin feel and can be cinched down for increased precision.

Additional Benefits

- SpeedVault Trail Plate is made of the same Pebax material used in our track spikes to deliver propulsive speed and agility over rugged terrain.
- TrailTack Green outsole provides superior traction on wet and dry surfaces and is made of 25% recycled material.
- Perforated outsole shaves weight while delivering high-performance traction, grip, and protection on the trails.
- 5.7 mm lugs.
- Nitrogen-infused DNA FLASH v2 midsole technology is lighter and provides nearly 10% more energy return than previous version.

What's New

- New TPEE air mesh is lightweight and breathable while remaining durable on the trails
- TrailTack Green outsole provides traction on wet and dry surfaces and is made of 25% recycled material
- New outsole design provides traction and grip on trails
- Midsole side walls are redesigned for a more comfortable in-shoe fit

Additional Benefits

- Forefoot outsole design uses biomimicry of a mountain goat to enhance control and stability on uneven terrain.
- Made with recycled materials equivalent to 6 plastic water bottles.

MOUNTAIN TRAIL

CASCADIA 17

Adaptable stability with trail-ready protection.

Adaptable stability

Our new Trail Adapt System utilizes an integrated midsole, rock plate, and zonal outsole pods to offer enhanced control and a stable ride over any terrain.

Enhanced traction

Biomimetic design draws from the anatomy of mountain goat hooves; the forefoot outsole is split to better grip uneven surfaces while zonal pods enhance control.

Soft cushioning

DNA LOFT v2 midsole technology provides soft cushioning over any terrain to deliver comfort as you explore.

What's New

- Trail Adapt System uses an integrated midsole, rock plate, and outsole system to deliver stability over any terrain.
- TrailTack Rubber technology provides wet-dry traction and is made of 25% recycled content.

Additional Benefits

- PrintDyed upper saves 66% of the energy and 75% of the water required for the traditional dye process (not applicable to GTX version).
- An articulated Ballistic Rock Shield between two layers of DNA LOFT v2 foam provides necessary protection without limiting flexibility needed for smooth transitions.
- TPU toe cap and mudguard provide protection and durability to the upper.
- Cascadia 17 made with recycled materials equivalent to 10 plastic water bottles (Cascadia 17 GTX materials equivalent to 11 bottles).

CASCADIA 17 GTX

Waterproof protection

GORE-TEX® Invisible Fit membrane is bonded directly to the upper for a lighter, more flexible fit.

LIGHT TRAIL

DIVIDE 4

A familiar fit with features made to tackle light trail terrain.

Transition from road to trail

DNA LOFT cushioning provides a soft, smooth ride from the roads to the trails while high surface area lugs provide necessary grip on offroad surfaces.

Versatile upper

The road-shoe inspired fit features updated mesh that enhances breathability while a TPU mudguard offers protection from the trails.

Reliable traction

TrailTack Rubber outsole technology offers traction on both wet and dry surfaces.

Additional Benefits

- Drainage slits in side of shoe.
- Creel sandwich air mesh is lightweight, breathable, and quick-drying.
- Tongue gusset provides secure and comfortable fit around midfoot.
- Toe cap offers light protection against gravel, sticks, and other debris.
- Made with recycled materials equivalent to 7 plastic water bottles.

Do your feet a favor

Whether we're on the run or on the job, our feet always support our success. Through extensive biomechanical testing and plenty of interviews with runners, walkers, movers, shakers, and workers on their feet all day, we crafted these shoes to serve real people.

Choose from footwear styles like the all-new Ghost Max, fan-favorite Adrenaline GTS 23, or the versatile Addiction Walker 2. The new Ghost Max provides a protective, supported feel to runners and walkers alike thanks to our unique midsole rocker geometry – GlideRoll Rocker – that actively assists in rolling your foot forward for an effortless feeling underfoot. A tall stack of DNA LOFT v2 foam to cushion every landing and reduce pressure underfoot for long-lasting comfort on the go. The Adrenaline GTS 23 is one of our most popular support shoes and offers plush, lightweight DNA LOFT v2 cushioning and our holistic GuideRails® support system for smooth strides and support your natural motion path, no matter how you move. Our Addiction Walker 2 makes every walk a piece of cake thanks to maximum support from our Extended Progressive Diagonal Rollbar and adaptive DNA cushioning technology. Wearers can also customize the fit of their shoes by choosing between our universal fit upper, a classic upper with breathable mesh and plenty of cushioning, or our StealthFit upper, which contours to the foot for sleek support.

Run - Walk - work Happy

 MAX SUPPORT

ADDICTION WALKER 2

Slip resistant. Supportive. Soon to be your favorite.

Maximum support

Our Extended Progressive Diagonal Rollbar (PDRB) is a support system for your entire body. It strategically positions arch support to guide and keep your body in its natural path of motion.

All-day comfort

DNA, our proprietary cushioning, adapts to your stride, weight and speed. Why? So it can help protect you by reducing impact on your joints.

Slip resistant

What stands between you and a lack of traction? An innovative outsole that's been certified (SATRA TM144:2011) for slip resistance.

What's New

- The full-grain leather upper is both comfortable and durable.

midsole

DYNAMIC CUSHIONING

DNA

A responsive midsole technology that cushions each step and adapts to a runner's unique stride, weight, and speed.

DNA FLASH

A nitrogen-infused midsole cushioning compound that provides ultralight softness with plenty of energy return to power your run.

DNA FLASH v2

We reengineered the chemistry of our fastest midsole technology to make it less dense and more — well, more everything. This super-fast foam is softer, lighter, and returns nearly 10% more energy than the original.

DNA LOFT

A finely calibrated mix of Brooks DNA foam, air, and rubber, DNA LOFT cushioning is our softest, engineered to provide softness underfoot without losing responsiveness or durability.

DNA LOFT v2

Lighter than the original but just as soft, DNA LOFT v2 has a unique balance of rubber, air, and a less dense, lighter foam for a plush feel that won't bottom out or weigh you down.

DNA LOFT v3

Nitrogen-infused DNA LOFT v3 is our most amplified soft cushion compound to date. We've fine-tuned the nitrogen infusion process in DNA LOFT v3 to deliver optimized softness, enhanced responsiveness, and lighter weight, all without sacrificing durability.

FLEXIBILITY & ALIGNMENT

Flex Grooves

Strategic etching underfoot that enhances midsole flexibility for an effortless forefoot ride without compromising the integrity of the cushioning.

Propulsion Plate

A propulsion plate that is engineered to push runners forward with every stride. It works with ultralight cushioning for optimal efficiency on race day.

SkyVault Propulsion Plate

Our new Pebax plate is engineered to aid in uphill running. When a runner steps on the plate and pushes off in stride, the plate bends and snaps back into place, delivering propulsion and assistance as the runner climbs. And the unique shape provides flexibility on technical terrain, as well as stability and comfort on downhills.

SpeedVault Race+ Plate

We engineered the SpeedVault Race+ Plate with carbon fiber composite material for lightweight, intense spring that propels runners to their next PR.

Segmented Crash Pad

Shaped like a caterpillar, a system of fully integrated shock absorbers that accommodates any foot landing to maximize efficiency, provide cushion, and create smooth heel-to-toe transitions.

Rapid Roll

The curved sculpting of the heel and toe of the midsole, combined with a carbon fiber plate, is constructed to propel you forward with effortless speed.

Trail Adapt System

Strategic configuration of zonal pods on the outsole, designed for traction and stability on uneven terrain.

SUPPORT

Extended Progressive Diagonal Rollbar

An extended version of our Progressive Diagonal Rollbar, which is a tri-density post at the medial arch that is biomechanically engineered to allow for progressive support and create smoother transitions from the midstance phase to the propulsion phase.

GuideRails®

An innovative, holistic, on-demand support technology that guides the body — hips, knees, and joints — into its natural motion path of least resistance.

outsole

Ballistic Rock Shield

A toughened, thermoplastic EVA sheath between the outsole and midsole that protects the forefoot by spreading out point loads from sharp objects.

Dual Stability Arch Pods

A passive support system utilized in the Dyad to enhance inherent stability without the use of a post.

IDEAL Pressure Zones

An outsole technology that evenly disperses impact away from the body for a comfortable and effortless ride.

Slip-Resistant Outsole (SATRA TM144:2011)

Slip resistance on both wet and dry surfaces.

TrailTack Rubber

A sticky rubber compound that provides outstanding uphill and downhill traction, even on wet surfaces.

TrailTack Green

The next generation of TrailTack Rubber, TrailTack Green includes recycled content, and requires less material to build than the original. So it's easier on the environment while still delivering excellent wet-dry traction on the run.

upper

3D Fit Print

An advanced screen-printing process to apply strategic stretch and structure for a seamless, impeccable fit.

Engineered Mesh

Custom-designed and strategically woven or knit mesh that provides optimal structure and breathability.

Fit Knit

Our premium knit construction specifically designed to move and expand seamlessly with your foot for a sock-like fit and optimal performance.

GORE-TEX® Invisible Fit

An updated lightweight membrane is bonded directly to the upper for a lighter, more flexible fit, offering breathable, waterproof protection on the run.

OrthoLite® Sockliner

Contoured insert designed to fill any negative space under the foot.

Stretch Woven

A pliable upper construction that wraps the foot in a sock-like fit.

Ultimate Sockliner

A PU insert with an OrthoLite® memory foam middle layer and convoluted egg-crate surface that provides substantial cushioning, breathability, and conformability.

Have you tried using FastTrack on your mobile or tablet devices?

Using FastTrack on the “go” is easy. In addition to our mobile app – available in your device’s app store – the full web view also scales to screen on your desktop, laptop, tablet, and mobile devices.

With FastTrack you can:

- View available inventory
- Place at once and future orders
- View order status and track shipments
- See who placed orders and access open baskets
- Email suggested baskets
- View and order from Brooks spotlight lists
- Scan barcodes to access product
- Sales reps can review and approve future orders

*For optimal performance, use Chrome as your web browser

FastTrack
BROOKS

LOCALLY

Did you know runners are 4x more likely to do their research on brooksrunning.com and buy in a physical store than they are to finish their purchase online?

Locally.com allows Brooks to tell online shoppers when you have our products available in store. We have found that retailers who share their inventory with Locally.com benefit from the web traffic on brooksrunning.com.

Signing up for Locally can:

Introduce runners to your store

Locally provides additional exposure to runners new to town or who haven't been into your store yet. Enjoy a customizable notification schedule that lets you receive text and/or email alerts during business hours. You also have the option to direct message with the shopper at any time during the ordering process. Retailers who share inventory with Brooks through our dealer locator on Locally get five times more views than those that don't.

Drive traffic and sales

On Locally, customers can choose between these options: Reserve Online/Pickup In Store, Buy Online/Pickup In Store/Same Day Delivery. Sales from these transactions on Locally have increased 4-6X throughout 2020 as customer shopping behavior has evolved. This expanded toolkit gives runners more opportunities than ever to shop your store. You can also accept orders for in-store pickup directly from brooksrunning.com, Facebook, your own site, and Locally.com.

Help us highlight your store

When our website inventory runs low, we direct runners to Locally to search retail inventory in their hometowns – at stores like yours! And Brooks can layer Locally's store locator tool into marketing campaigns to drive attendance to store events.

New

Locally now offers Same Day Delivery. To provide support for new shopping behaviors, Locally now enables all participating retailers Same Day Delivery with no additional cost. Same Day Delivery is a great addition to in-store or curbside pickup. Available in Postmates market (US only for now), standard 3.5% transaction fee plus carrier delivery charges still apply.

Have any questions or just want to get started? Contact your Brooks rep, or head straight to www.locally.com/go/launch.
