MIZUNO CREW 21

MIZUNO GLOBAL SUSTAINABILITY

MIZUNO CREW 21 was launched in September 1991 as our global sustainability commitment to protect the planet for future generations. As Mizuno recognized that all corporate business activities

affect the environment, we focused on contributing to the preservation of the global environment with our company activities every day. Starting April 2021, we have been designating all the Mizuno Sustainability activities as **"MIZUNO CREW 21"**

We will contribute to social, economic, and environmental sustainability, as well as the fulfillment of our relevant activities by integrating innovations and constantly improving our products and services. We endeavor to ensure a future in which people cultivate a healthy mind and body through sport.

VISION

We believe in a sustainable future in which all people live equally on a safe and healthy planet. While respecting the dignity of all people, we will continue to nurture a beneficial future, where sports can be enjoyed anytime, anywhere and without reservation.

MISSION

To protect our planet earth, the stage on which we play sports. By integrating innovations in our products and services, based on science, for the benefit of society and inspired by nature, we endeavor to ensure a future in which people cultivate a healthy mind and body through sports.

PURPOSE

MIZUNO CREW 21 is our global sustainability commitment to protect our planet for future generations.

ENVIRONMENT

We are committed to achieving a sustainable society through actively contribute to the conservation of the global environment in all business activities and actions of all individuals.

As we provide products and services that embody the diverse value of

sports, protecting the global environment where people around the world can live with peace of mind and play lively sports is an important issue.

HEALTH

Believing in the collective power which sports can contribute to the mental and physical health of people.

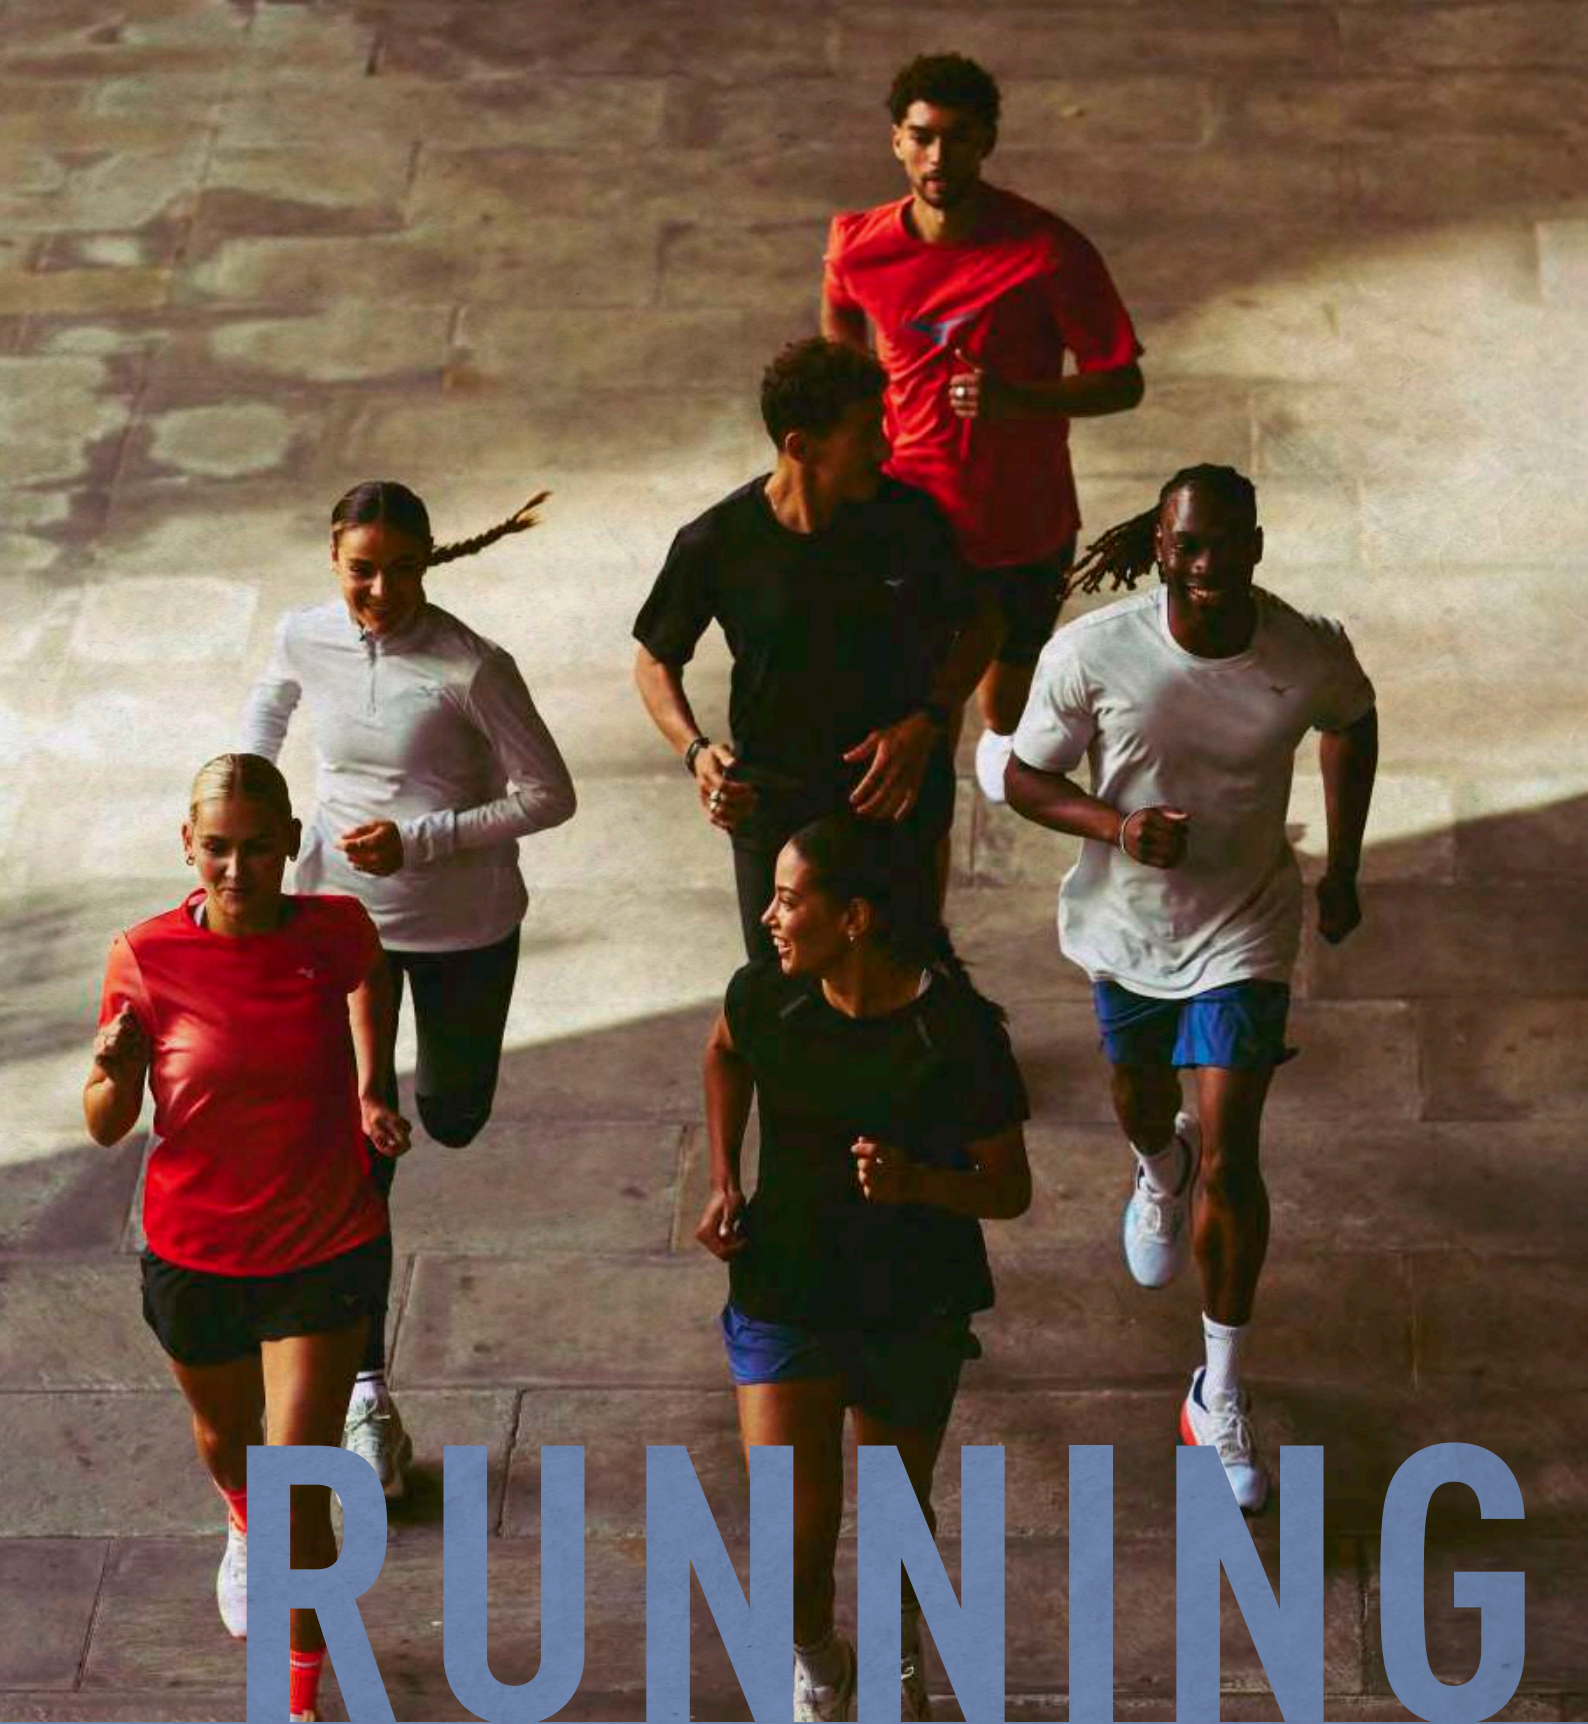

Sports have the ability not only to maintain physical and mental health, but also to foster communication across countries and generations by contributing to bring out the potential of people and regions.

Mizuno supports more people to access sports and contributes to the realization of a richer and more sustainable society in which each person can shine.

HUMANITY

United in respecting diversity to contribute to the realization of a future in which all people respect, understand and accept each other.

We believe in a world in which all people can live in equally. To bring us closer to that – our company respects the diversity of all people and provides better sporting equipment, places and opportunities for playing sports to all, regardless of nationality, race, gender, age or physical ability, through our sincere business activities.

ENGINEERED FOR SMOOTH, SWIFT PERFORMANCE

Experience smooth, effortless runs featuring Mizuno's signature bouncy running sensation with this toplevel model from the NEO series. It combines Nitrogen Infused Mizuno Energy Nxt cushioning with a fulllength Mizuno Wave Plate for powerful energy return, stability, and forward propulsion.

BENEFITS

- Sole - Nitrogen Infused Mizuno Energy Nxt in the top midsole delivers amazing energy return and cushioning.
- The bottom midsole is made with regular Mizuno Energy Nxt to enhance stability.
- The full-length Mizuno Wave Plate with a carefully crafted shape delivers both cushioning and stability.
- Grip was enhanced by updating the sole grooves to be deeper and sharper.
- Smooth Speed Assist supports a smooth and efficient running form.
- Upper - The one-piece knit upper offers a comfortable fit around the foot

WAVE SKY 9

GLIDE THROUGH THE SKY

This shoe was crafted and enhanced for runners who love a cushioned running experience that almost feels like floating. The midsole was enhanced with NITROGEN INFUSED MIZUNO ENERGY NXT for even better cushioning and energy return. Plus, FOAM WAVE enhances the shoe's stability without sacrificing softness, and the Smooth Stretch Woven envelops the foot with breathable comfort.

BENEFITS

- MIZUNO ENERGY NXT - This shoe is equipped with MIZUNO ENERGY NXT for softness and high energy output. NITROGEN INFUSED MIZUNO ENERGY NXT is used for the upper midsole.
- MIZUNO WAVE - FOAM WAVE enhances stability during running without skimping on softness.
- Smooth Stretch Woven - Offers a soft, enveloping fit that gradually stretches horizontally without stretching vertically. The improved weaving technique enhances breathability across the entire instep for even more comfort.

COMFORT-FUELED PERFORMANCE

The latest in Mizuno innovation, this shoe delivers premium comfort and performance for serious runners seeking balance in their training. The allnew Nitrogen Infused MIZUNO ENERGY NXT+ in the top midsole offers exceptional cushioning and energy return, while the stable, smooth bottom midsole supports each stride with a boost of energy. The high stack height and wide ground contact area provide unmatched cushioned stability, and the soft engineered mesh upper and knit tongue gently wrap your foot for comfort after even the most intense runs.

BENEFITS

- MIZUNO ENERGY NXT+ - The top midsole features the all-new Nitrogen Infused MIZUNO ENERGY NXT+ for exceptional cushioning and energy return.
- MIZUNO ENERGY NXT - The bottom midsole is designed as a base for the top midsole, it delivers not only premium cushioning but also stability and smoothness during runs.
- Wide and stable landing platform
- Soft engineered mesh - Flexible mesh softly wraps the runner's foot.
- Knit tongue & gusset - The knit tongue and gusset construction deliver a premium, secure fit.

GO THE EXTRA MILE

Designed for dedicated runners, this lightweight daily trainer enables smooth and efficient running with enhanced stability. The Smooth Speed Assist design and Mizuno Energy NXT provides exceptional cushioning and energy return while maintaining a strong ground feel. The upper combines breathable mesh and stretchy knit. It is a reliable, highperformance option for versatile uses from jogging to fasterpaced runs.

BENEFITS

- Sole - This high-performance, lightweight daily trainer with Mizuno Energy NXT excels in both cushioning and energy return. The outsole has better grip than the previous version due to the deeper grooves.
- The Smooth Speed Assist in the midsole design supports a more efficient running form.
- Upper - The upper is a fusion between mesh and knit material and offers a great fit.

WAVE HORIZON 9

SAFE, STABLE, RELIABLE

Designed to provide superior protection for runners and walkers that overpronate or enjoy significant stability underfoot. Accomplished by using a duallayer MIZUNO ENERGY NXT and MIZUNO ENERGY midsole, asymmetrical Mizuno Wave and integrated rubber wall, the Wave Horizon 8 ensures an ever reliable platform for all wearers.

BENEFITS

- Upper - The upper was renewed from the previous model and now uses a more breathable material. Plus, the Smooth Stretch Woven minimizes horizontal stretch, helping maintain proper foot positioning during runs.
- Sole - The top midsole is made from MIZUNO ENERGY NXT, which is soft and light while offering excellent energy return. The bottom midsole uses MIZUNO ENERGY, ensuring both soft cushioning and stability. The stability is further enhanced by the asymmetrical Mizuno Wave design, wide fit, and integrated rubber wall on the inner side of the Mizuno Wave.

WAVE INSPIRE 22

SIGNATURE STABILITY REVITALISED

Featuring a fully redesigned midsole utilising Nitrogen Infused Mizuno Energy NXT for exceptional cushioning and powerful energy return, the Inspire 22 has reimagined the idea of stability trainers. Designed for runners with overpronation, the updated supportive MIZUNO WAVE plate enhances stability by preventing arch collapse while enabling smooth weight transfer. The breathable mesh upper ensures a secure, comfortable fit.

BENEFITS

- Sole - Featuring a completely redesigned Nitrogen Infused Mizuno Energy NXT midsole, the Inspire 22 provides the perfect blend of cushioning and response. The heel-toe drop has reduced 2mm from the previous version to 10mm, to provide a more natural running feel.
- MIZUNO WAVE (Support type) - Wave shape designed for people with overpronation. The anatomical plate shape follows the shape of the foot for smooth weight transfer from ground contact to kick off.
- Upper - The mesh upper provides excellent breathability and a comfortable fit.

STACK MM	28,5 / 38,5

USP

The Mizuno Energy NXT midsole delivers a significantly smoother midsole experience than previous versions, whilst the re-imagined wave plate works in unison to deliver a very stable ride.

TARGET CONSUMER

Recent versions of the Inspire were a little firm for many runners, but with the Inspire 22, this all changes. Runners of all levels needing rearfoot stability or simply a reassuring ride will greatly benefit from the greater cushioning and smoother transition.

AW26 UPDATE

OUTSOLE

TECHNOLOGIES

MIZUNO FORTRUSH

BUILT FOR EVERY RUN

Designed to especially suit runners with overpronation, this versatile shoe is excellent for everything from jogs to training for marathons. The midsole features Mizuno Energy NXT for superior cushioning, energy return, and a lightweight feel. The shoe has the perfect stack height so you can feel the ground, while the rubber wrapup outsole enhances stability. The soft mesh upper with a molded heel counter ensures a secure yet comfortable fit, with a roomy toe box for lasting comfort on long runs.

BENEFITS

- Sole - The midsole is equipped with Mizuno Energy NXT for cushioning, energy return, and a light weight. The design has a stack height that is not too high, allowing you to feel the ground as you run. The outsole features a rubber wrap-up design from the heel to the midfoot on the inner arch side to support stability.
- Upper - The molded heel counter minimizes foot movement during running. The main upper area is made from soft mesh, yet still provides the necessary support for running. The toe box is slightly roomier for lasting comfort during long runs.

MIZUNO α III JAPAN

DESIGNED FOR PURE SPEED

This boot gives top players the speed advantage they need to dominate the game. Designed and made in Japan, the boot has an outsole with triangular studs for vertical speed, KaRVO material for powerful propulsion, and MIZUNO ENERGY for superior heel cushioning and energy return. The insole with a MIZUNO ENERGY xp SOCKLINER provides softness and energy return at a light weight. Featuring the Engineered Fit Last NEO and a revamped knit upper, the boot delivers an unparalleled fit.

BENEFITS

- **Shoe last** - Uses the Engineered Fit Last NEO, which was redeveloped for modern football players. The last, which has been meticulously redesigned down to the smallest detail, achieves a fit that only Mizuno could deliver.
- **Sole** - The outsole continues to focus on vertical speed. The „KaRVO“ insole material at the forefoot offers high energy return and generates forward propulsion. Plus, MIZUNO ENERGY in the heel enhances cushioning and energy return.
- **Insole** - The insole features a MIZUNO ENERGY xp SOCKLINER, made from high-performance material with a top-level combination of softness and energy return at a light weight.

MIZUNO α III ELITE

BLAZE PAST THE COMPETITION

Designed for the fastest players on the pitch, this cutting-edge MIZUNO α III model delivers explosive speed with an evolved fit. The Engineered Fit Last NEO and knit upper with integrated tongue provide soft comfort, while Mizuno's precise stitching technology ensures a snug fit. The outsole with triangular studs was designed for propulsive forward speed on the pitch, with MIZUNO ENERGY in the heel for superior cushioning and energy return.

BENEFITS

- **Upper** - Pursuing an even softer and more comfortable fit, the upper was completely revamped for a structure that integrates its knit material and the tongue. Incorporates Mizuno's unique technology for precisely placed stitching on a carefully selected soft, lightweight knit material to maximize fit.
- **Insole** - The insole features a MIZUNO ENERGY xp SOCKLINER, made from high-performance material with a top-level combination of softness and energy return at a light weight.

MIZUNO α III PRO

LEAVE OPPONENTS IN THE DUST

Engineered for speed and comfort, this MIZUNO α III model is perfect for players who are serious about improving their performance. It delivers an exceptional fit with its Engineered Fit Last NEO and all-new knit upper construction featuring precision stitching. The durable outsole, built for vertical acceleration with triangular studs, ensures stability and longevity, while the MIZUNO ENERGY xp SOCKLINER provides superior softness and energy return.

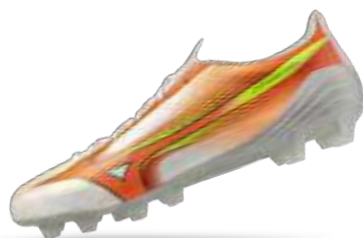

BENEFITS

- **Shoe last** - Uses the Engineered Fit Last NEO, which was redeveloped for modern football players. The last, which has been meticulously redesigned down to the smallest detail, achieves a fit that only Mizuno could deliver.
- **Upper** - Pursuing an even softer and more comfortable fit, the upper was completely revamped for a structure that integrates its knit material and the tongue. Incorporates Mizuno's unique technology for precisely placed stitching on a carefully selected soft, lightweight knit material to maximize fit.
- **Insole** - The insole features a MIZUNO ENERGY xp SOCKLINER, made from high-performance material with a top-level combination of softness and energy return at a light weight.

MIZUNO NEO JUMP

DARE TO DEFY GRAVITY

Designed for players who want to jump higher than ever, this cutting-edge model is packed with the latest technology to maximize jumping functionality: MIZUNO ENERGY xp. Present both in the midsole and insole it provides an epic combination of softness, energy return, and lightweight. The XG Rubber outsole ensures superior grip during fast motions, delivering stability and control on every landing. The shoe is remarkably lightweight reducing fatigue over long matches.

BENEFITS

- The high-performance material MIZUNO ENERGY xp, which integrates softness, energy return, and lightness at an advanced level, is used in both the midsole and insole to fully unleash the player's jumps.
- The extra-grade rubber delivers outstanding power during fast and intense motions.
- The upper features see-through mesh to pursue enhanced fit and lightweight.
- The Dyna-Eyelet Wrap structure of the eyelets creates a wrap-around fit that envelops the entire foot.

The WAVE STEALTH ELITE combines an upper with engineered mesh and a half-bootie construction for a light, breathable, and snug fit. The MIZUNO ENERGY xp insert in the forefoot midsole, the XG+ Rubber outsole, and the external heel counter deliver outstanding cushioning, energy return, and stability, while the plate on the outer upper supports agile directional changes. Designed for top players, this shoe balances lightweight performance and stability to help elevate your game.

BENEFITS

- With its engineered mesh and half-bootie construction, the upper offers a light and comfortable fit, while the panels under the mesh ensures a great stability.
- MIZUNO ENERGY xp insert in the forefoot midsole area and MIZUNO ENERGY xp sockliner ensure excellent energy return and cushioning.
- With the latest and most performant XG+ Rubber, the outsole offers a greater grip.

MIZUNO NEO ACE

NEXT-LEVEL ENERGY RETURN

This Mizuno Tennis flagship model is the first to ever feature Mizuno Energy xp throughout the entire midsole, delivering fantastic energy return and cushioning for agile, flawless footwork. The sole is also crafted with a shank structure for stability on lateral shifts, a supportive midsole structure, and D-FLEX GROOVE at the mid-foot for effortless, quick turns. Finished with a revamped upper for enhanced stability, cushioning, and flexibility, this model is built for top players who demand both speed and stability on the court.

BENEFITS

- With MIZUNO ENERGY xp in the entire midsole length, MIZUNO NEO ACE offers amazing energy return and cushioning, that will take your footwork to the next level.
- The agility frame from the midfoot to the heel prevents lateral shifts and provides the needed stability for intense plays.
- Made with Mizuno's most durable rubber: DX Rubber, which 1.5 times more durable than the regular DuRubber.
- supercritical foam manufacturing method. The resulting
- D-FLEX GROOVE reinforces the midfoot rigidity, enhances acceleration and supports smooth changes of direction.
- The upper structure features a balance of stability, fit, and flexibility by controlling the CPU density. The heel fit was also reviewed for enhanced comfort.

WAVE EXCEED TOUR 7 PADEL

SENSE OF SPEED

Engineered for speed-driven players, this latest model is designed to deliver lightning-fast takeoff, explosive acceleration, and seamless directional changes. The upper has been improved ensuring a secure fit and an outstanding comfort. The updated materials in the sole provide an exceptional combination of energy return, softness and cushioning at a light weight. Lastly, the shoe adopts DX Rubber, the most durable rubber material in Mizuno's history.

BENEFITS

- MIZUNO ENERGY nxt brings high energy return at the ball of the foot and heel areas to support quick and powerful first steps, while the high-performance MIZUNO ENERGY xp insole provides the best softness, energy return, and lightness.
- The brand-new DX Rubber is the most durable rubber in Mizuno's history offering a great grip and maneuverability in intense games.
- The newly developed upper features a tongue following the foot's shape, with a secure hold on the foot while maintaining flexibility and lightness.

WAVE EXCEED COURT PADEL

ALL-AROUND AMAZING

Active tennis players can count on this shoe for amazing comfort and agility at a light weight. It was crafted to enhance changes in direction and swift movements during play through incorporation of MIZUNO ENERGY in the forefoot plus a MIZUNO Energy insole. It also uses the same sole design as Mizuno's top model. The two-color mesh and RB logo provide a fresh look that conveys speed.

BENEFITS

- By adopting MIZUNO ENERGY in the forefoot area and MIZUNO ENERGY INSOLE, this model provides the necessary support for the quick changes of direction and swift movements required for a speed model.
- With the incorporation of a two-color mesh and the RB logo, it achieves a sense of speed and freshness.
- The use of a mesh material in the inner vamp creates a simple yet luxurious look.

IDEAL STABILITY

This shoe is an especially excellent option for players seeking stability. The design of the flex grooves is perfect for players who tend to use their toes to grip the ground, extending their range of motion and supporting more dynamic footwork. The heel was also enhanced for better stability, and MIZUNO ENERGY NXT was added to increase the cushioning.

BENEFITS

- Stability for every movement. Hit the ball with the ideal form.
- The design of the flex grooves allows players to use their toes to grip the ground.
- Heel part designed to improve heel stability. Improved heel fit to support stability when stepping down.
- Equipped with MIZUNO ENERGY NXT for greater cushioning.

TECHNICAL GLOSSARY

TECHNICAL GLOSSARY

WAVE TECHNOLOGY

	Parallel Wave Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.		Fan-shaped Wave Wave technology which features various Wave heights, delivering excellent cushioning and stability.
	Infinity Wave Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.		Double Fan-shaped Wave Wave technology that gives the highest levels of support combined with excellent cushioning.

ALL SPORTS

	Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape absorbs and disperses the impact at foot strike, which results in a smoother, more cushioned feel on every step.		ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.
	The DynamotionFit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.	AIRmesh	Breathable and cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.
	Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.	Removable INSOCK	Removable insock for comfort and cushioning.
SR touch	An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.	Premium INSOCK	A high-grade removable insock for comfort and cushioning.
MIZUNO COB	MIZUNO COB (center of balance) is a midsole structure with multiple pods that activate body awareness to increase balance.		Provides a well cushioned landing with amazing energy return. This midsole material surpasses all expectations of comfort set by previous materials.
	Redefine what Energy return should feel like with this super soft and bouncy midsole material created by Mizuno for our top line products.		

TECHNICAL GLOSSARY

RUNNING TECHNOLOGIES

AeroHug	The new MIZUNO upper technology holds the foot stable during the run for a secure fit and an unrivalled comfort. A soft fabric mesh stretches and wraps around the foot to create the most comfortable ride.		Pebax® Powered Wave Plate for lightweight energy return
X10	Durability and Traction. X-10 is an extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and gives more traction at the heel strike.		The Wave Plate is constructed with a bio-sourced Pebax Rnew® plate. This provides extremely lightweight support and energy return, empowering athletes with every step.
	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leads to trail shoes that adapt to their surroundings and work in perfect harmony with the body.		An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. It gives an energised, euphoric and super-comfortable run.
	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.	ESS Rock Plate	An extra solid sheet rock-plate in the forefoot which provides superb protection against stones and rock.
	A unique midsole compound providing high comfort and performance, while being extremely lightweight.		Waterproof, breathable fabric membrane upper technology.
	An engineered approach to minimise the rapid acceleration and deceleration of the foot during transition, creating the smoothest ride possible.	Blown Rubber	The pressure absorbing blown rubber outsole optimizes pressure distribution throughout the forefoot.
WAVEKNIT	A knit construction inspired by our Mizuno Wave technology. It's dynamic stretch and hold abilities provides a sock-like fit that feels natural every step.	XPJP	A completely new type of midsole compound that delivers cushioning, rebound and durability at a high level. The exquisite harmony of the super soft and advanced cushioning with high energy return makes you feel as if you are floating on water.
EL8	A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.	XtaGrip	A outsole construction that provides superior grip on various surfaces thanks to it's adaptive abilities. Allows for high traction on soft surfaces and high friction on firm surfaces.
	Vibram's innovative lug design which solely focuses on offering superior traction.		Vibram's high performance rubber compound which offers a superior grip on dry and wet terrains.

TECHNICAL GLOSSARY

FOOTBALL & RUGBY TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
	Upper delivers a high level of softness and durability with a structured fit.
	A unique midsole compound providing superb comfort and performance, while being extremely lightweight.
	It is a revolutionary concept, with an integrated memory foam construction which controls three key performance characteristics: Fit, Stability and Touch.

	Grippy insock material that stops the foot from sliding inside the shoe.
	R-Fiber mesh controls the upper stretch and securely holds the foot during acceleration and turns.
	Highest kangaroo leather quality for premium comfort fit and natural ball touch.

RACKET SPORTS TECHNOLOGIES

	A unique upper providing the highest level of softness and durability, while maintaining breathability.
	An exceedingly lightweight midsole material with excellent comfort and resilience properties.
	Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
	Durability and Traction. X10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.
	The BOA Fit System contains three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. It is engineered to optimize fit and provide precision, adaptability, and control.

TECHNICAL GLOSSARY

INDOOR TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		An exceedingly lightweight midsole material with excellent comfort and resilience properties.
	A performance outsole component that enhances traction where needed most.		Specifically designed flex grooves in the outsole to improve stability and on court agility.
	Dura Shield protects your toes and increases the product durability.		Super soft and durable synthetic collar lining insert which adds comfort and durability when using ankle braces.
	A shock-absorbing cushioning compound.		

TECHNICAL GLOSSARY

APPAREL TECHNOLOGIES

	Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best performance.		Mizuno FreshPlus technology adds an anti-bacterial and deodorising function to your garment, creating a fresher and odour reducing product.
	Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.		Mizuno DynamotionFit technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.
	Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.		CoolTouch technology provides a soft feeling and leads to extremely quick drying.
	Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.		BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.
	Improvement in performance through key muscles being warmed to optimal level for efficient energy output.		Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.
	Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.		SolarCut technology reflects sunlight ultraviolet waves by reducing the light transmission and thus keeping the body cool.
	Saving water with pure performance. Waterless dyeing process, without added chemicals, that saves up to 25 liters of fresh water per tee shirt dyed.		Mizuno DRY AEROFLOW provides superior breathability even under sweat condition and keeps the body cooler.
